About Me

Self-taught programmer looking to go into front-end or full-stack web development. Background in writing, QA, and design, with a strong interest in different languages and cultures.

Experience

Proofreader, BDO USA, LLP; Columbus, OH; 2019-2021

- Checked numbers and grammar in financial statements and SOC reports
- Formatted documents to comply with company standards

QA Analyst/Technical Writer, Epic Systems; Madison, WI; 2018-2019

- Performed QA testing to find software bugs
- Wrote release notes for end users of healthcare software

Technical Writer, THK Manufacturing of America, Inc.; Hebron, OH; 2018

- Revised translated material for readability
- Designed branding materials
- Edited pieces from engineers
- Learned basic Japanese

Education

B.A. Linguistics, English minor, 2018, 3.9 GPA

Ohio State University, Columbus, OH

Technical Skills

- HTML, CSS, JavaScript
- React, Webpack
- Working knowledge of SQL, Python, and Adobe InDesign

Projects

- **The Alphabet Store** - A website made with React where users can shop for letters of the alphabet and update their shopping cart as needed.
- **Owen Wilson Says Wow** - An app that uses an API call to get the movie, director, character, and occurrence of any time Owen Wilson has said "Wow."
- **Smileship** - A peaceful version of Battleship, made with Webpack, where the user plays against the computer.
